FAQ

What's the difference between one, two and three-piece recorders?

One piece recorders are best for beginning players and classroom settings. Why? Because younger players might have a tendency to turn the bodies (the joints) and make changes to the tuning. Older, more accomplished players and their teachers will appreciate the 2 and 3 piece recorders for playing in ensembles because of the ability to change tuning and gain more precise intonation.

BRADLEY BONNER METHOD

Getting Started with Soprano Recorder

An innovative and motivating way to introduce first time players to the soprano recorder. The CD included offers all of the lesson tracks, plus performance versions, for play-along after the lesson has been learned. The DVD tracks demonstrate visually and audibly the physical process of playing the instrument. Notes to face appear on the staff synchronized with the audio that accompanies them. Teachers can face the DVD video toward the players and the audio toward the audience if music notation is required for performance.

Recorders Without Borders I by Nina Stern

Nina Stern is one of North America's leading performers for the recorder and classical clarinet. She is also hailed as an innovator in teaching school age children to be fine young musicians. She performs regularly as a principal player with the New York Philharmonic and New York City Opera. Only three notes - B, A, and G have been used. The addition of percussion enlivens the pieces immeasurably. Solo soprano recorder.

Making Tracks, Recorder Exploration, Composition and Improvisation by David Thaxton

Making Tracks is born from an active approach to teaching. It makes use of imitation, playing by ear, connections to language and movement, musical exploration and improvisation. The teacher guides activities using "Sound Before Sight" and unfolds lessons by echoing, mirroring, call-and-response, small group work and singing games. The PowerPoints, included on the CD, contains full color visuals needed to teach each lesson.

SP2419

The Elemental Style by Paul B. Cribari and Richard D. Layton

Based on the models presented in Orff and Keetman's Music for Children volumes. A must-have resource for teachers of the elemental style. Guiding the reader from the foundational concepts of basic rhythmic cells and elemental forms to the construction of melodies and static accompaniments in the pentatonic and diatonic modes. Supplemental resources include a glossary of frequently used terminology in composition for the elemental instrumentarium along with practical and technical ranges of the various instruments.

SP2420

NEW Recorder with Poems and Tales by Donna Basil

Developing technique on recorder, as with any instrument, requires a certain amount of repetition. Stories and poetry can be the perfect vehicle for this repetition. Whether it is a single note, a combination of notes, or an entire melody, this book contains examples for each type of repetition. Stories and poetry can also be used as an effective tool for creativity, by providing inspiration and parameters. In addition, stories can be used to tie together several short melodies for performance or review.

SP2422

soundbells

A brand-new addition to our Boomwhackers® and CHROMA-NOTES® family!

Soundbells® close a gap in educational instruments used for making music in the classroom. The "handy" instruments ideally complement Orff Instruments and Boomwhackers®, two of the most dynamic names in modern music teaching. By using small bellows to generate sound, this instrument is suitable for every age group, and you can start making music right away. Differentiated playing with varying sound lengths and volume levels is an important quality in making music with Soundbells®. Group play of the Soundbells® produces a natural sound similar to a harmonica or an accordion. In this way, Soundbells® provide a unique additional timbre to a musical arrangement for several instrument groups. Even Soundbells® alone as a homogeneous body of sound can produce a can produce a pleasant musical outcome.

- Joyful playing for the young and old
- Produces different sound lengths and intensities
- Intuitive handling
- Ideal for music education and therapy

Great learning tool for arts integration into the classroom!

Rhythm Clock

As a STEAM music teacher, I am constantly searching for ideas to connect my classroom to the outside world. The Rhythm Clock has unlimited possibilities. By using the DVD, the kids are able to learn dictation while connecting the note values to both math and science. Without the DVD, rhythmic composition is a breeze. The circular shape helps my students understand that only 4 beats can fit into a 4/4 measure.

The Rhythm Clock is both a music and math manipulative that provides a great STEAM to STEAM bridge.

FROM THE GAMES METHOD, WE BRING YOU THE RHYTHM CLOCK™

This cross-curricular learning tool came out of The STREAM-liners program, run by an organization called The Artist: Outreach. Founded by Joseph Vincelli, they integrate music with other subjects, such as vocabulary and geometry, in order to reach learners of all types. The clock comes with a board with the 12, 3, 6 and 9 delineated and comes with manipulatives that allow learning in a number of different areas. All pieces have the note on one side and the corresponding rest on the other side and feature the Note Knacks® color system. You receive: 1 whole note/rest, 2 half note/rests, 4 quarter note/rests, 8 eighth notes/rest, and 16 sixteenth notes/rest.

- The clock also shows the 4 directions with north pointing on the "12" position on the clock and features fractions on the note side with corresponding decimals on the rest side.
- Each piece features the percentage of the circumference of the board.
- The back of the board has a table of shapes, fractions, decimals, notes, rests, degrees, percentage, and money
- Includes a DVD that plays all of the sample rhythms so your students can experience the sounds as well!

HANDS-ON MUSIC LITERACY

Note Knacks are an interactive, hands-on learning tool that allows children to learn and absorb music notation concepts by working with these specially-designed manipulatives. The tiles provide kids with a physical representation of the five different rest and note values by length, color and notation. The note is on one side; the rest is on the other. Also, each tile is color coded so if you say the color, you say the rhythm! Included time signature "frames" for 2/4, 3/4, and 4/4 time allows kids to self-correct their work.

The Note Knacks lesson plans that supplement the tiles works for all kinds of learners utilizing visual, aural, and kinesthetic cues, and offers opportunities for quick and easy assessments in the classroom and can be used in a classroom, small group setting, or individually. Children are able to internalize the concepts and create their own compositions, building a strong musical foundation.

The Student and Teacher sets of Note Knacks include:

- | | |
|-------------------------|--|
| 1 – whole note/rest | 8 – eighth notes/rests |

What teachers are saying about Note Knacks®!

"I believe Note Knacks are the single most important purchase I've made in over 11 years of teaching elementary music. The children 'get it' almost immediately. And in 2nd grade when they are learning fractions with their regular teacher, we are able to do the same in music with a very visual tool. My curriculum revolves around them."

- Katie, Paulding County

All this week when I poured out my Note Knacks on the floor to set the students up for solving the first measure of a Orff piece we are working on, students excitedly exclaimed "Oh, I LOVE these!"

- Mrs. Hunter Y. Britton, The Villages Charter Schools

"I love it! Getting 5th graders who don't want to do anything - but they will use these! Note Knacks have brought some new joy to my class and my teaching!"

- Joshua Bradford, Ft Worth, Texas

"I just had to tell you that I was able to use your Note Knacks with my students immediately upon my return from the conference and they were a huge hit. I am currently in a guided composition unit with 2nd-5th grade levels and have used Note Knacks to help students write their rhythms. It was a great success."

- Gary W. Lenz, Buford City, Georgia

"It has reached my kinesthetic learners and grabbed my visual learners. The best investment in my elementary program in years and we are already seeing the benefits!"

- Anna Jo Knight, Abernathy, Texas

"They help me do less lecture and allow the students to explore rhythms on their own. They are also a wonderful center tool for an introduction to composition."

- Rachel Namain, Klein, Texas

"I have used the Note Knacks system in my classroom for 5 years and all I can say is "WOW!" Every student in my school now reads rhythms at or above grade level expectancy."

- Kelly McGovern, Tomball, Texas

"I was introduced to Note Knacks at a conference and immediately fell in love! I knew that if I couldn't stop playing with them that they would be sure to keep my students engaged. I have used them for whole group work, workstations, composition and even rhythmic remediation. They are one of my go-to teaching aids."

ACTIVELY RINGING BY EMILY BRACKNEY

Get your students Actively Ringing! Bells and chimes are accessible instruments that can be used to teach ostinato, chords, simple accompaniments, and basic small-group composition along with music literacy. Teachers can combine these instruments with unison and part-singing, recorders, Orff instruments, and movement. This book provides fresh ideas for children to actively make their own music and accompany their own singing. Most of these activities will translate easily to a performance situation without requiring students to have individual scores in front of them. For teachers with large music classes, the activities involve everyone simultaneously, i.e., we play, you sing, they move, and we ALL make music! Includes book and DVD.

Early Childhood

BOB MCGRATH RHYTHM BAND SET

The instruments included in this unique set were selected by Bob McGrath on "Bob on Sesame Street", and are sure to be a hit with preschoolers and kids in the early elementary grades. The instruments can be used successfully with the Music For Fun! book and CD by Warner Brothers, and also with Bob's other recordings listed on this page. RB52

Winner of Parents' Choice Award

Set includes an interactive CD, performed by Mark Walker and narrated by Bob. Listeners discover each instrument in a game by the Sound, Shape, and Color. Listeners can then play along with five world rhythms: Cha Cha from Cuba, Awa Odori from Japan, Soudi from Egypt, March from New Orleans, and Samba from Brazil. In each of the World Rhythms, Mark plays three or four authentic percussion instruments from that country. Listeners learn the names and sounds of 13 different world percussion instruments that Bob identifies.

Set consists of 8 diatonic notes beginning with middle C to C above. 8 mallets included. **RB2123**

Children's 8 Note Bell Set

This is specifically designed for grades K-3 as an exploratory instrument. Accurately pitched, it has a diatonic range from C to C2. An excellent low priced set of bells in color with note name on each bar. Pair of mallets included. **RB2305**

8 Note Diatonic Step Bells

One octave diatonic set beginning with C above Middle C. Ideal for grades K-4. Each bar is electronically tuned. A good teaching tool to aid in explaining the relationship between pitch and elevation. Pair of mallets included. **RB2303**

Resonator Bell Step Ladder

This unique teaching aid enables students to see the relationship between pitch and elevation by placing resonator bells on the step ladder. Does not include bells. **RB991**

Chromatic Bell Set For Beginners

- 2 chromatic octaves from A4 to A6
- 25 bars in the colors of a piano keyboard
- 2 mallets included • Collapsible metal legs
- Built into case for durability and portability

8 Note Diatonic Bell Set
