

## Rhythm Band INSTRUMENTS

**Kristin Pugliese**  
Founder and Creator of  
the Note Knacks Method.

**Rhythm Clock** - Innovative and Intuitive This cross curricular learning tool integrates music with other subjects, such as vocabulary and geometry to reach learners of all types. The clock comes with a board with the 12, 3, 6 and 9 delineated and manipulatives that allow learning in a number of different areas. All pieces have a note on one side and a corresponding rest on the other side and feature the Note Knacks color system. Includes a DVD that plays all of the sample rhythms so students can experience the sounds as well!

**Note Knacks** - An interactive, hands-on learning tool that allows children to learn and absorb music notation concepts by working with these specially-designed manipulatives. The tiles provide kids with a physical representation of the five different rest and note values by length, color and notation. The note is on one side; the rest is on the other. Each tile is color coded so if you say the color, you say the rhythm! Included time signature "frames" for 2/4, 3/4, and 4/4 time allows kids to self-correct their work. The Note Knacks lesson plans work for all kinds of learners utilizing visual, aural, and kinesthetic cues. Offers quick and easy assessments. Use in a classroom, small group, or individually. Children internalize the concepts and create their own compositions, building a strong musical foundation.
