

TWIN TREM PEDAL

TRY IT OUT AT NAMM BOOTH #7714

FEATURES AND BENEFITS:

- Two independent Tremolo's: The Optical circuit is based on the original Silvertone Twin Twelve amp, the other is a 60's style harmonic circuit. Use both together or independently
- Separate inputs & outputs allow players to use each tremolo circuit in different places in their effects chain
- Two gain controls feature LED backlit knobs that pulse according to the rate setting
- The Pedal features a durable, polished stainless steel shell and runs on a standard 9v power supply
