

pTrumpet.

authentic. innovative. accessible.

pTrumpet has been designed by musicians, for musicians. Here is why pTrumpet is the best choice for you:

1. Unbeatable sound quality and free-blowing feel as a result of pTrumpet's patented leadpipe technology combined with the same, smooth bore size throughout the instrument.
2. An innovative fully plastic valve system - including three identical and fully interchangeable valve pistons with short throw action makes pTrumpet accessible for beginners and professionals.
3. Great resonance through the valves because each valve piston is precision engineered from a single, solid piece of material.
4. Easy to hold and very durable against dents and scrapes due to strong but light in weight plastic material throughout the whole instrument.
5. Rests effortlessly in your hands, regardless of size or grip, because of its unique ergonomic design.
6. Enormous strength and rigidity for improved resonant sound and robustness as a result of its one-shot monocoque bell.
7. British designed with precision manufacturing delivering, the highest quality performance of any plastic instrument maker in the world.
8. BioCote® anti-microbial technology to ensure that the playing environment remains protected - exclusive to pTrumpet.
9. The most accessible price, the highest specification and the most outstanding value of any plastic trumpet on the market.
10. Each pTrumpet comes with a set of our "Training Valve Caps" allowing users to customise the feel of the valve spacing to the size of their hands, great for beginners with small hands.

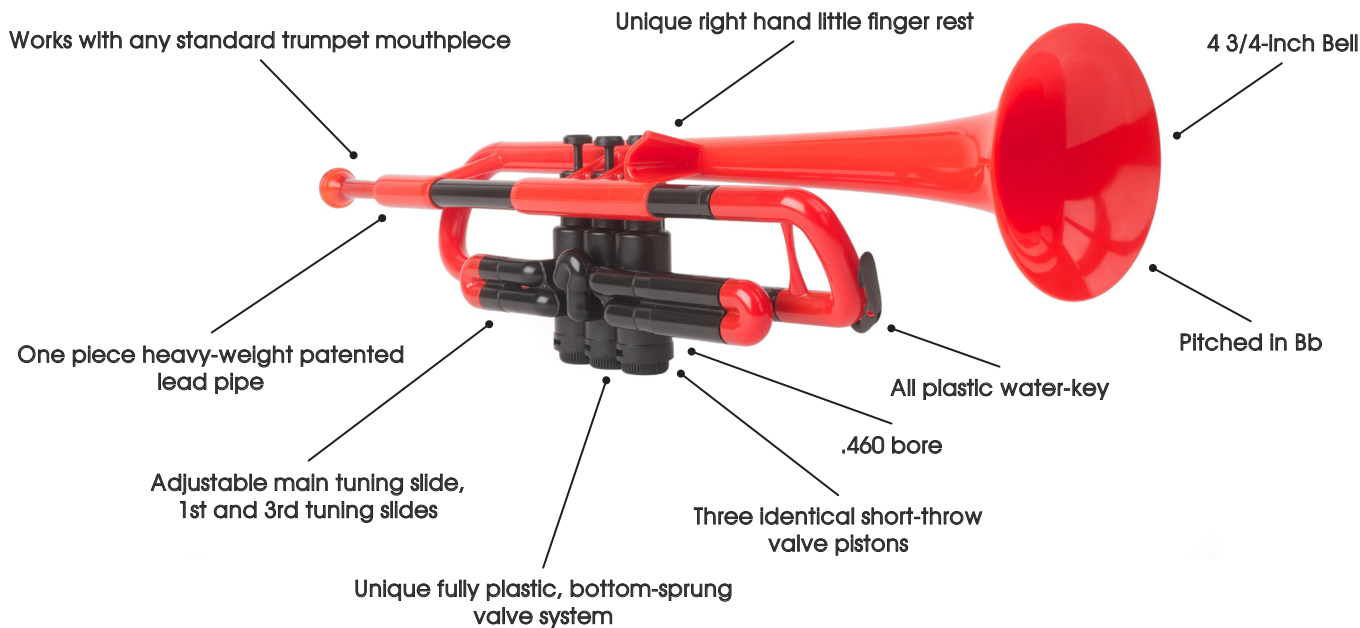

pTrumpet.

pTrumpet is the world's first ever all-plastic trumpet
